Toolbox

Illustrated guide

Toolbox user guide

Scan, merge, split, compress and copy text out of documents, entirely on your phone. No account, no upload.

Version 1.0.0 · October 2026 · Mabs SD

Before you start

About this guide

This guide walks through everything Toolbox does, one task per page. Each page shows the real screens with numbered steps, and the same steps written underneath.

Everything happens on your phone. Toolbox has no internet permission, so your files never leave the device. File names in the pictures are examples.

Contents

1 **Getting started** 3
Three quick pages on first launch, then you are on Home.

2 **Finding your way around** 4
What is on the Home screen and where each tab takes you.

3 **Scan paper to a PDF** 5
Photograph pages, clean them up and export one PDF.

4 **Merge PDFs** 6
Join several PDFs into one file, in the order you choose.

5 **Split out pages** 7
Pull the pages you need out of a PDF into a new file.

6 **Shrink a file to fit a size limit** 8
Pick a target size and Toolbox compresses until it fits.

7 **Copy text from a photo** 9
Turn a photo of a page into text you can paste anywhere.

8 **Find, share and delete files** 10
Everything you make is kept in Files, newest first.

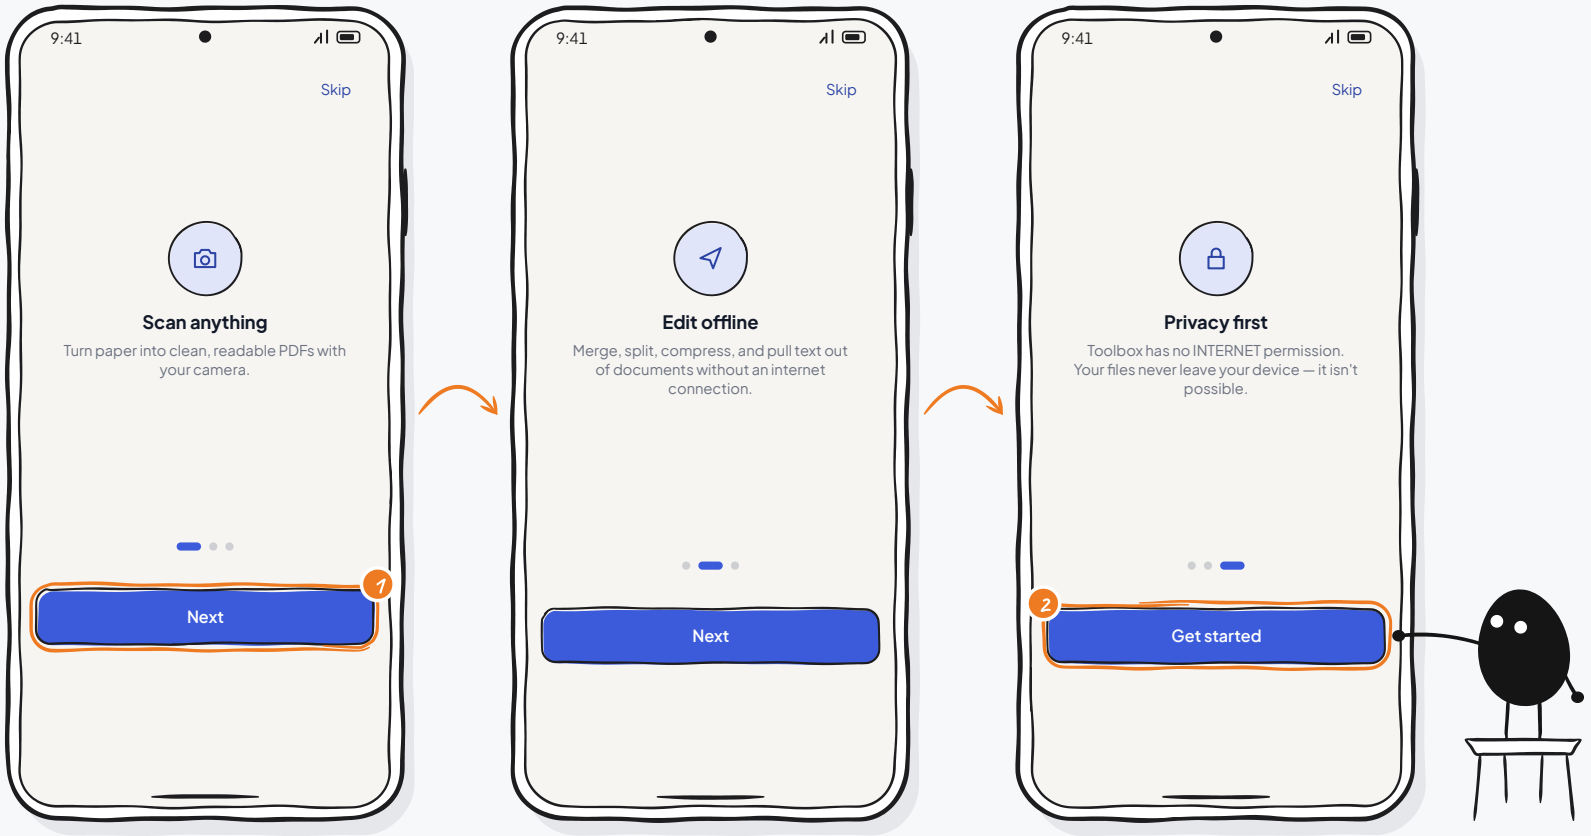

9 **Open files from other apps** 11
Share a PDF or image to Toolbox, then pick a tool.

10 **Light, dark and privacy** 12
Pick a theme, and see why your files stay on your phone.

Guide 1

Getting started

Three quick pages on first launch, then you are on Home.

1. Tap **Next** (or swipe)
2. Tap **Get started**

Skip goes straight to Home

Guide 2

Finding your way around

What is on the Home screen and where each tab takes you.

STEP BY STEP

1. Scan paper into a PDF
2. Open a tool in one tap
3. See every file you've made
4. Switch between tabs

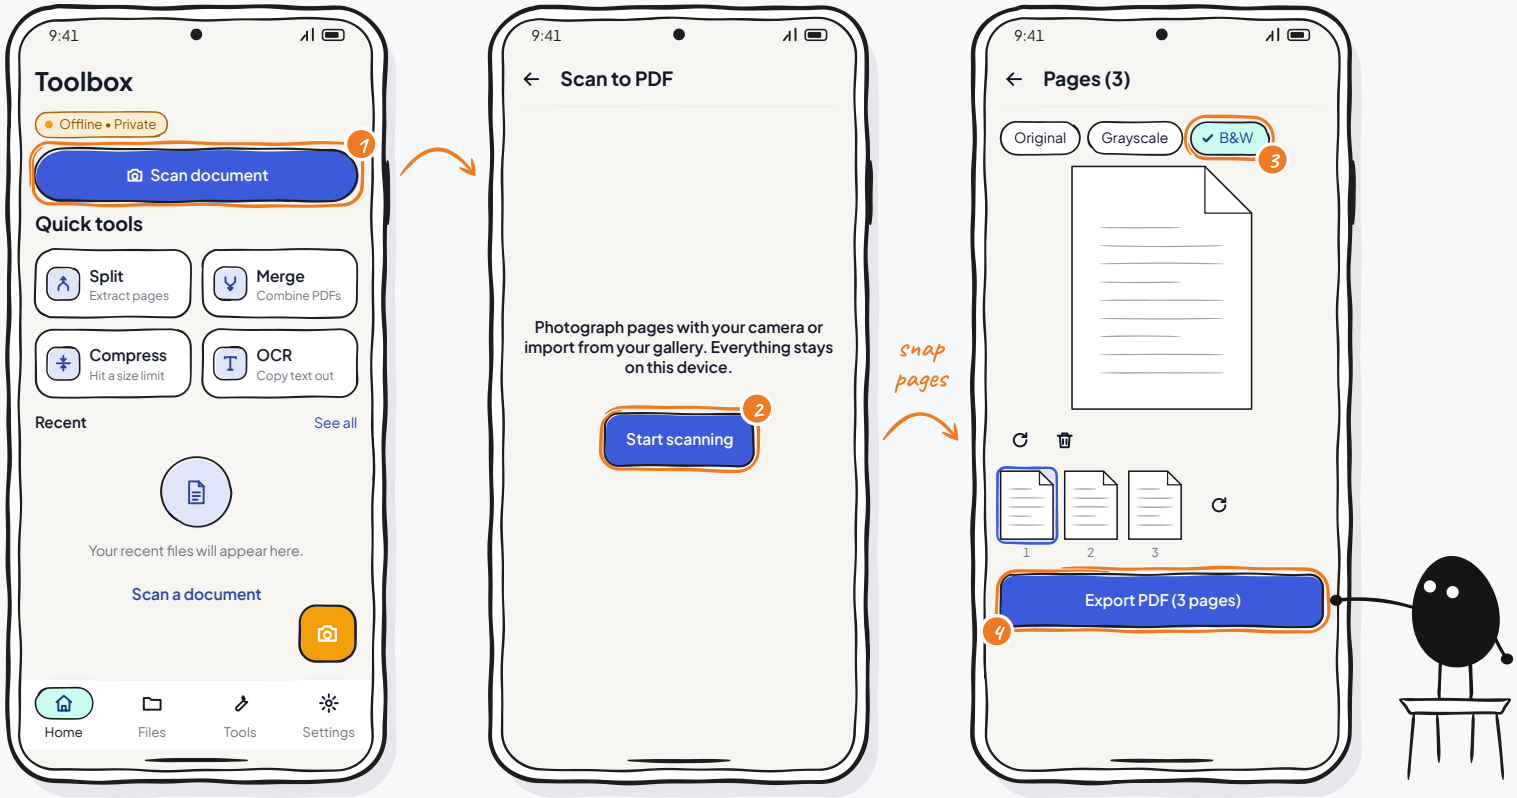

Scan from Home or Files

No account needed Everything runs on your phone, so there is nothing to sign up for.

Guide 3

Scan paper to a PDF

Photograph pages, clean them up and export one PDF.

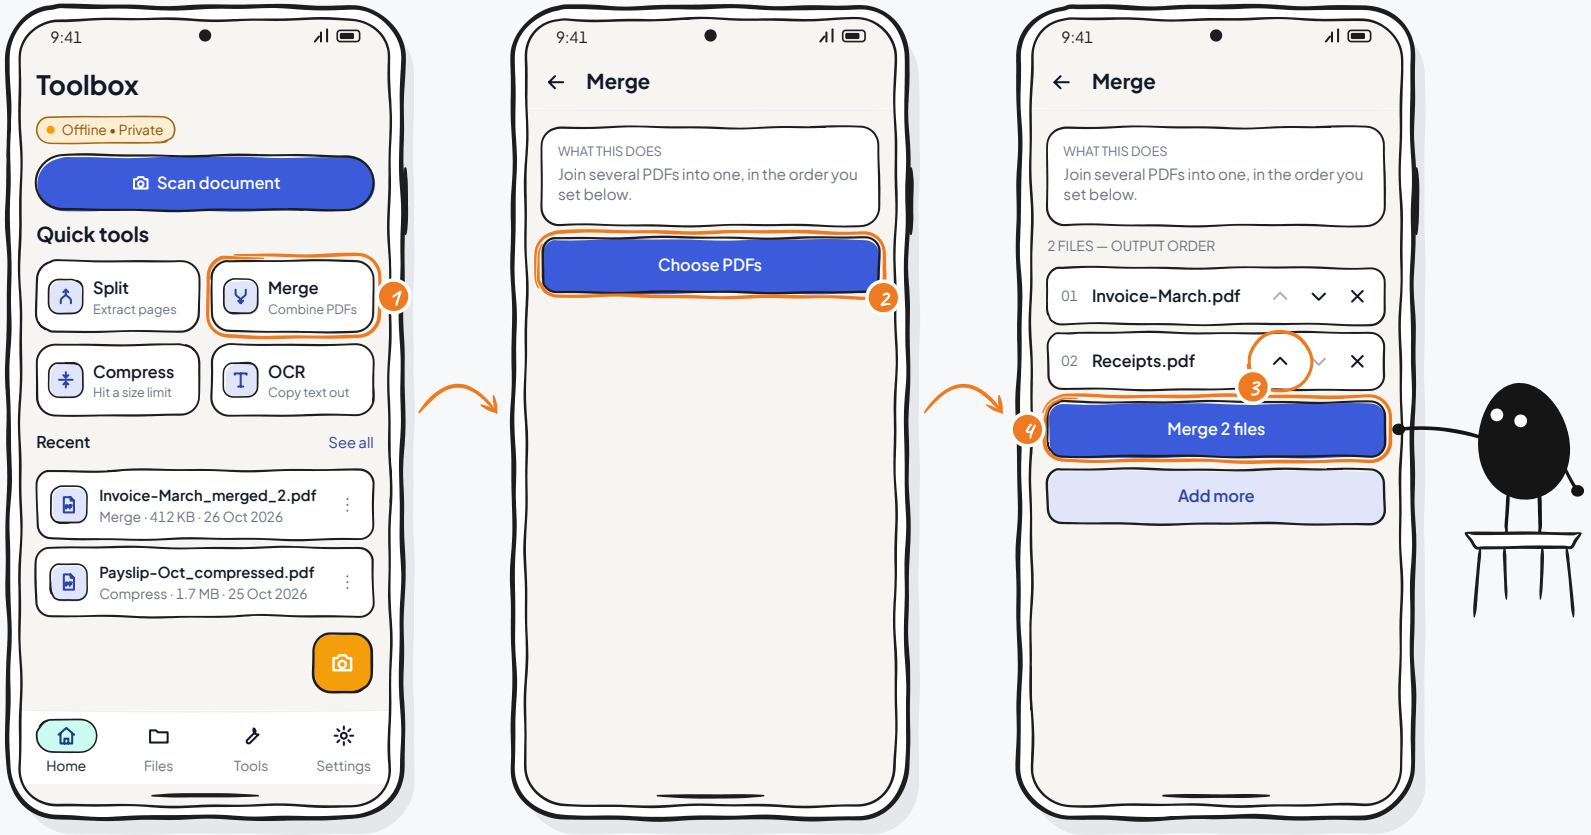

1. Tap **Scan document**
2. Tap **Start scanning** and snap your pages
3. Pick **B&W** for crisp text
4. Tap **Export PDF (3 pages)**

Add more pages at any time

Guide 4

Merge PDFs

Join several PDFs into one file, in the order you choose.

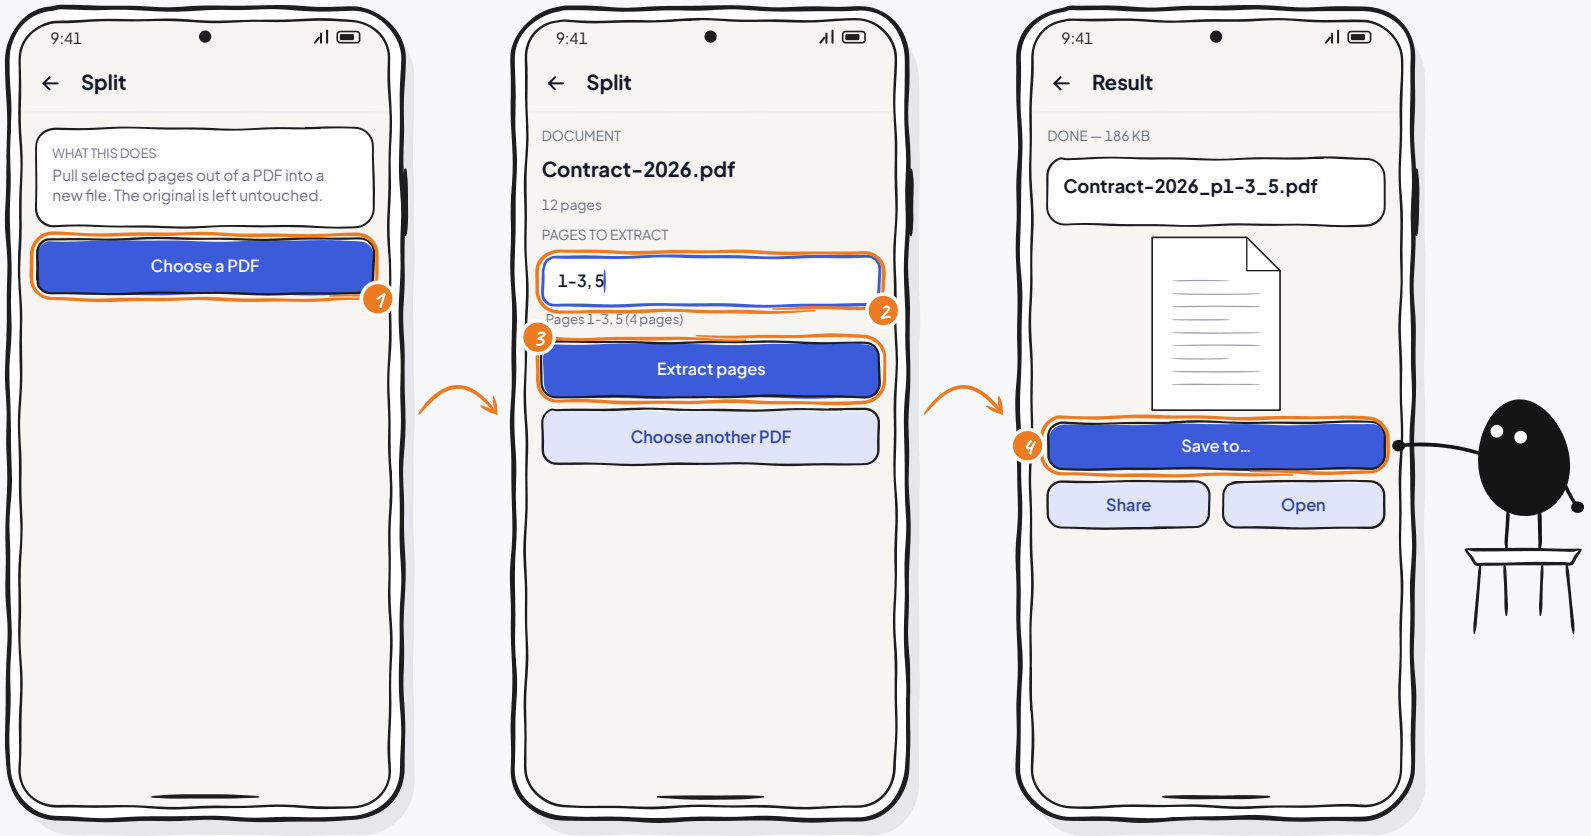

1. Tap **Merge**
2. Tap **Choose PDFs** and pick your files
3. Use the arrows to set the order
4. Tap **Merge 2 files**

Picked only one? Tap **Add more**

Guide 5

Split out pages

Pull the pages you need out of a PDF into a new file.

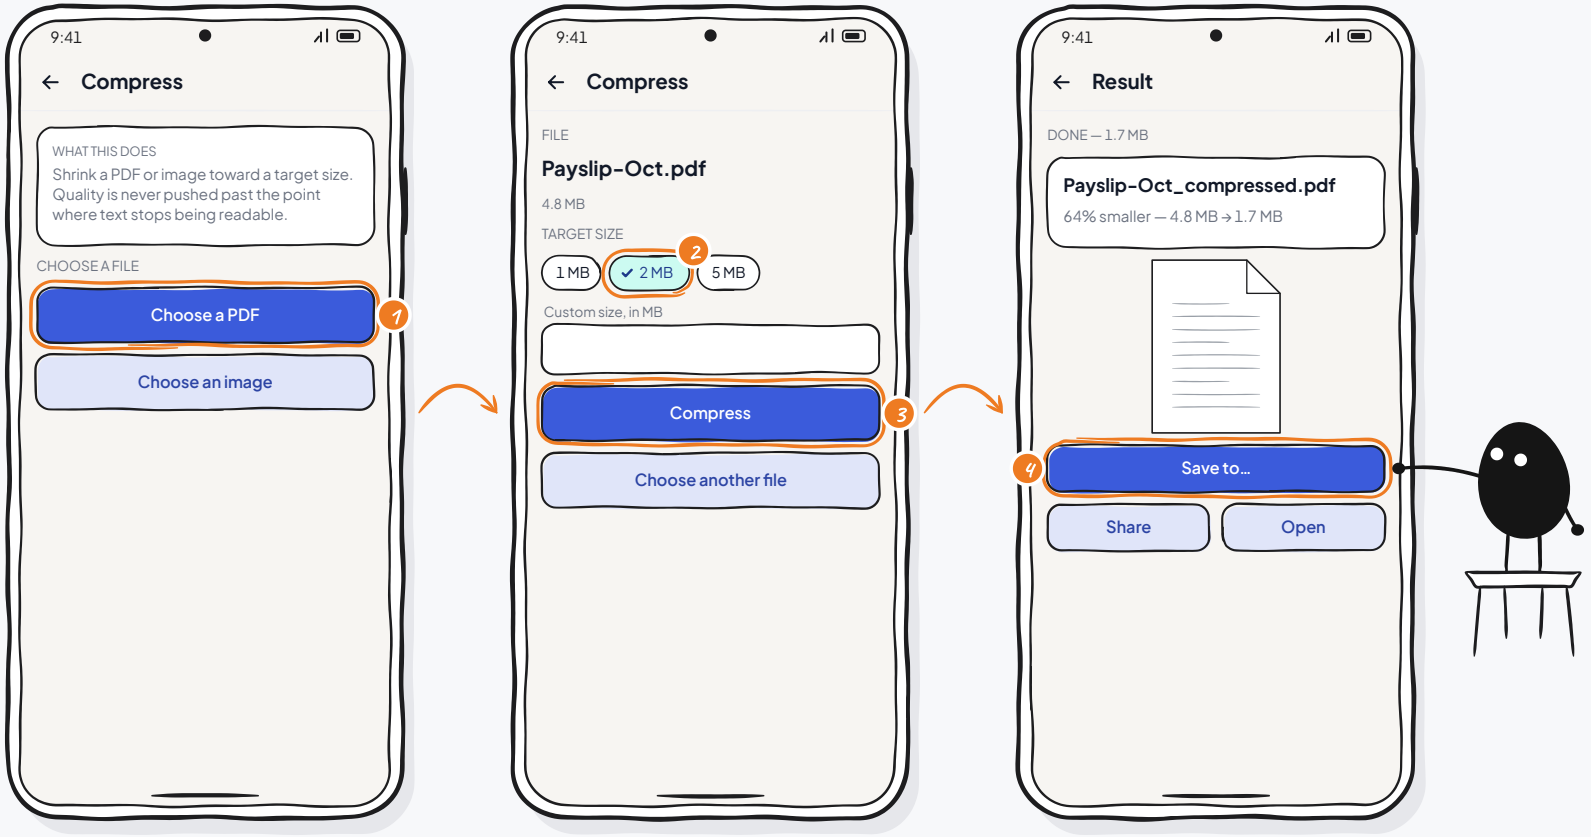

1. Tap **Choose a PDF**
2. Type the pages, like 1-3, 5
3. Tap **Extract pages**
4. Tap **Save to...** or **Share**

i Your original PDF is never changed

Guide 6

Shrink a file to fit a size limit

Pick a target size and Toolbox compresses until it fits.

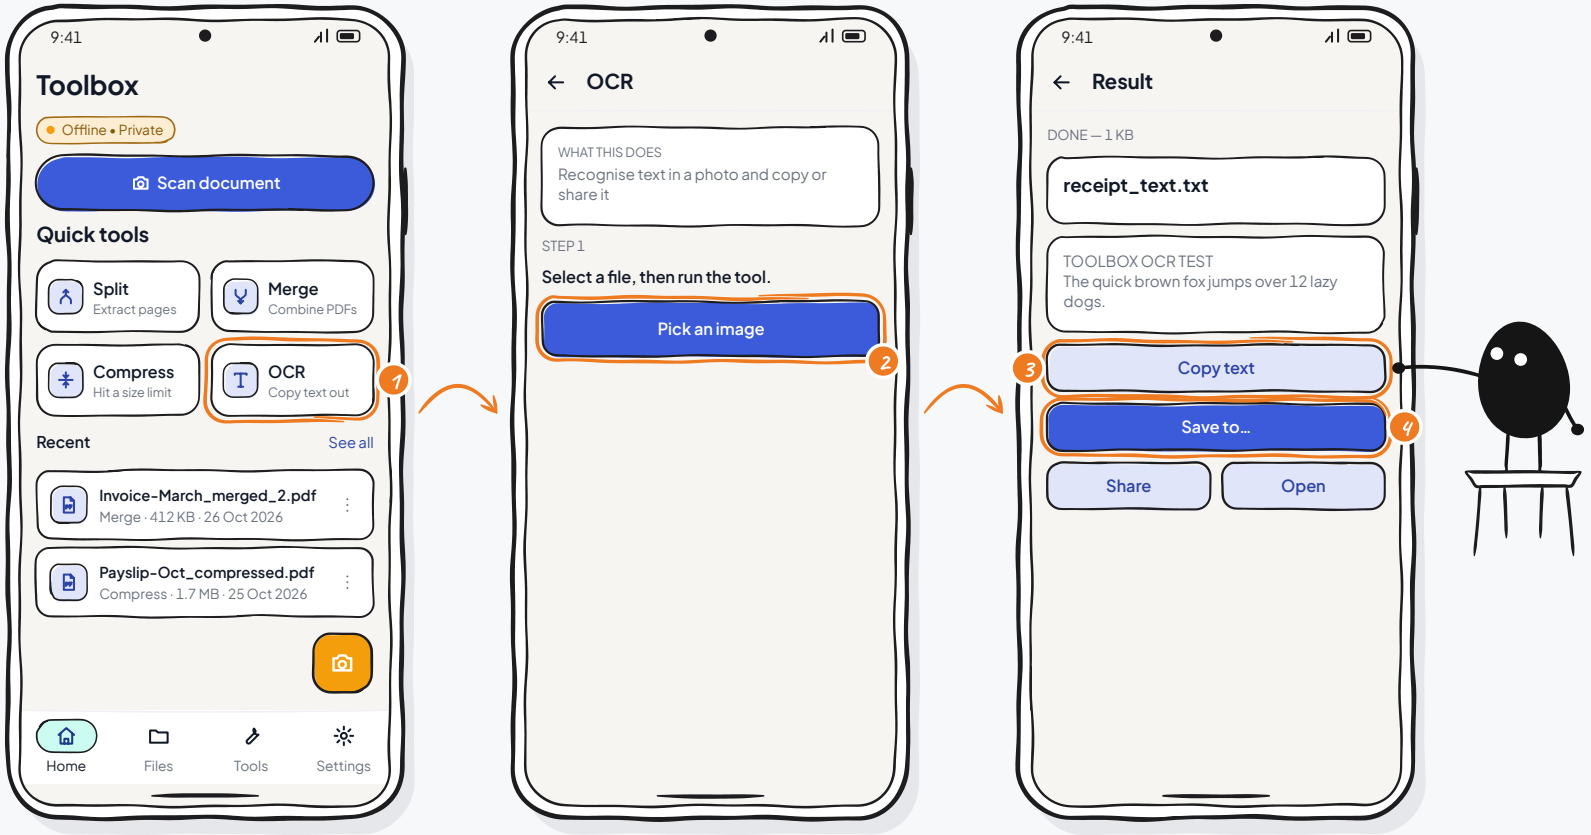

1. Tap **Choose a PDF** (or an image)
2. Pick a size, like **2 MB**
3. Tap **Compress**
4. Save or share the smaller file

Why a target size? Upload forms often reject files over 2 MB. Toolbox shrinks the file until it fits, and never makes it bigger.

Guide 7

Copy text from a photo

Turn a photo of a page into text you can paste anywhere.

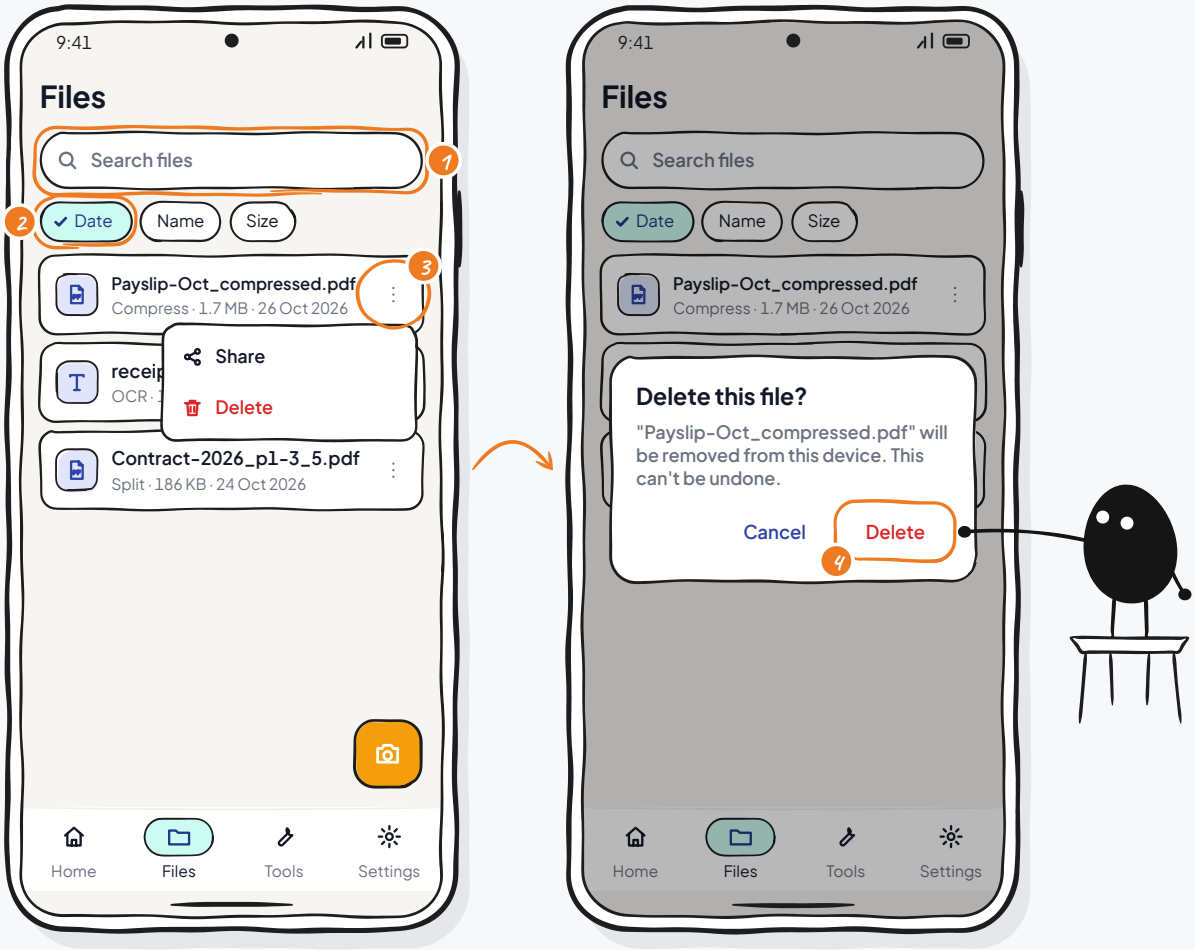

1. Tap **OCR**
2. Tap **Pick an image**
3. Tap **Copy text**
4. Or save it as a .txt file

Recognition runs on your phone

Guide 8

Find, share and delete files

Everything you make is kept in Files, newest first.

STEP BY STEP

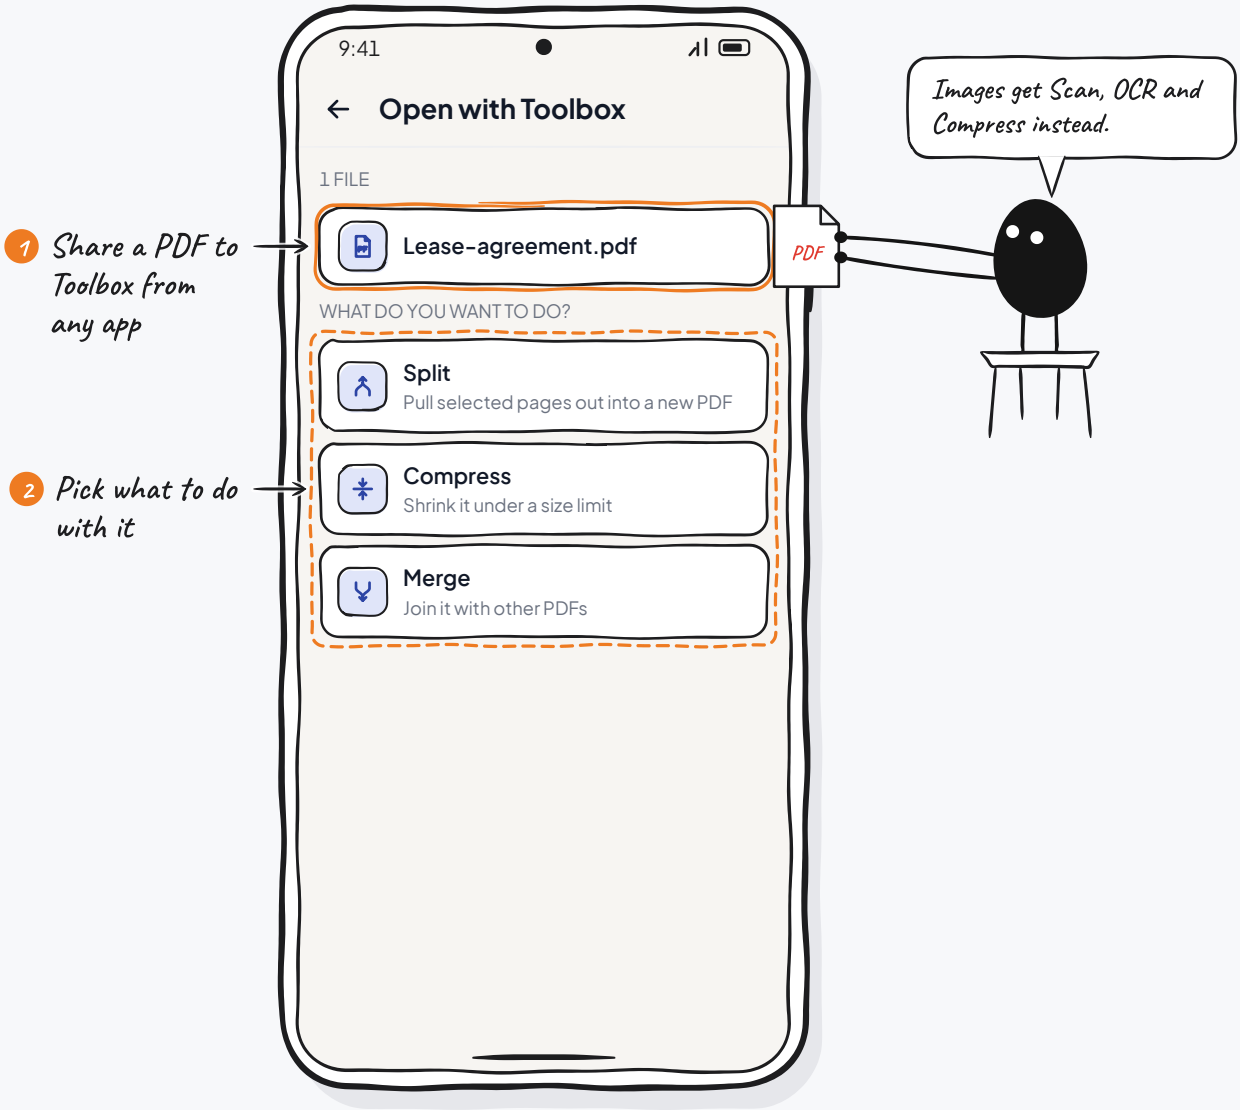

1. Search by name
2. Sort the list
3. Tap ⋮ to share or delete
4. Tap **Delete** to confirm

Tap a file to reopen it

Guide 9

Open files from other apps

Share a PDF or image to Toolbox, then pick a tool.

STEP BY STEP

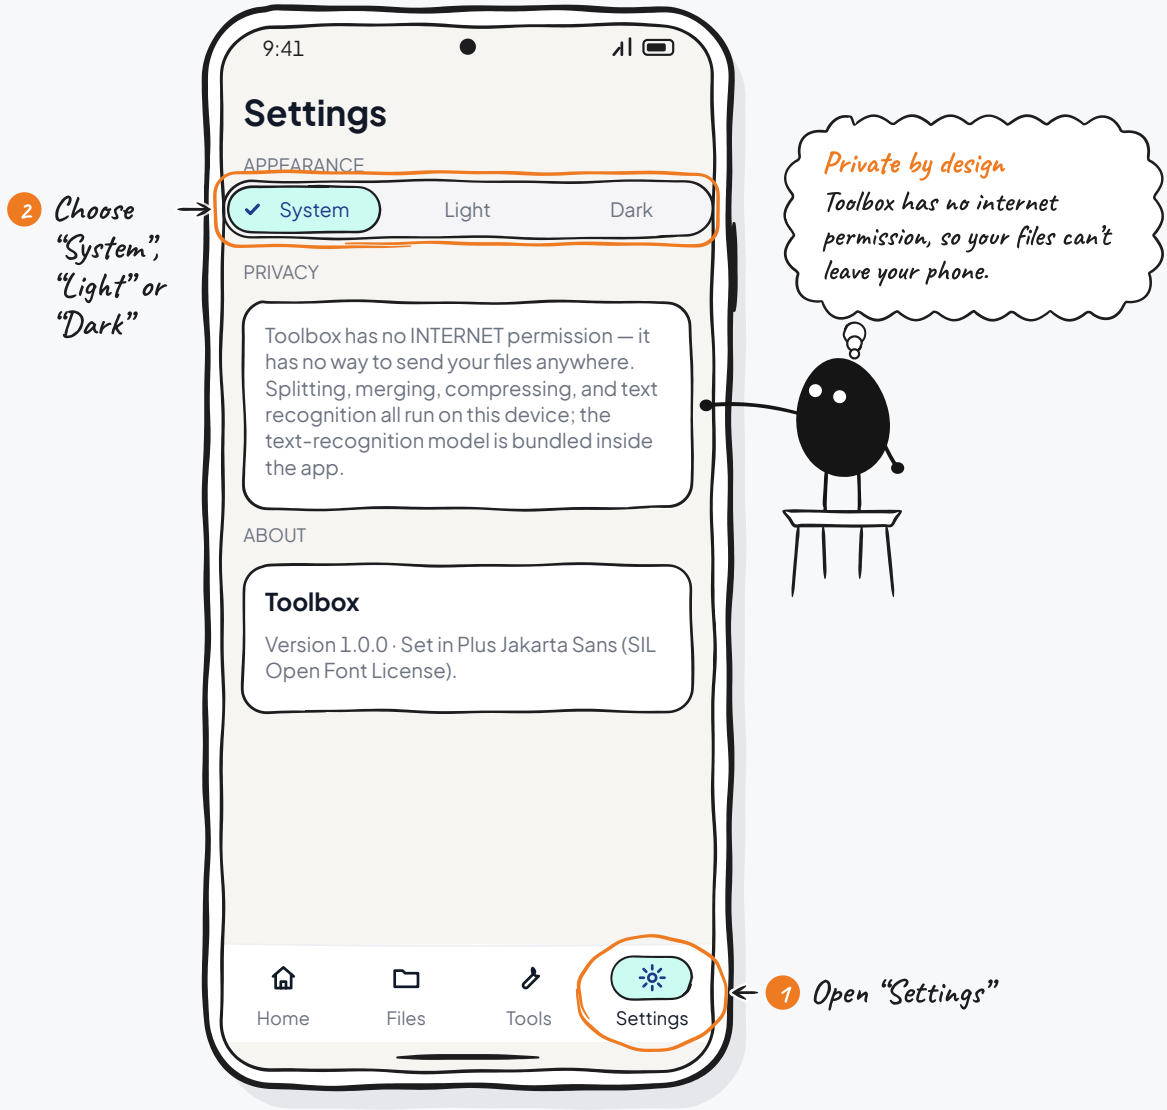

1. Share a PDF to Toolbox from any app
2. Pick what to do with it

> *i* Images get Scan, OCR and Compress instead.

Guide 10

Light, dark and privacy

Pick a theme, and see why your files stay on your phone.

STEP BY STEP

1. Open **Settings**
2. Choose **System**, **Light** or **Dark**

Private by design Toolbox has no internet permission, so your files can't leave your phone.
